

Controlling pitch

Singing with each other

Autumn leaves *CD tracks 7 & 8*

OK, so the words aren't relevant to the summer term. You could perhaps make up your own.

This is a very simple round which works well in two or three parts.

Use an alto xylophone or metallophone to show the children how the song is based on a scale of notes going down (start on C)

The children will be able to play this for themselves. Can two or three of them play it as a round? (Encourage them to use two beaters when they play)

When the children sing, encourage them to pitch accurately and be aware of others singing around them. When performing as a round make sure it doesn't turn into a which-part-can-sing-the-loudest competition!
